

RAFALE PICKLEBALL PADDLE 7409

SPECIFICATIONS :

- Color: Brown / Cyan
- T700 12K Carbon Fiber: The Rafale paddle is constructed using premium T700 12K carbon fiber, offering a superior strength-to-weight ratio for increased power and durability on every shot.
- Fusion-Fused Monolithic Build: This cutting-edge monolithic build ensures a seamless construction, providing a unified feel and enhancing the stability of the paddle for more consistent performance.
- 16mm Thickness: The 16mm thickness strikes a perfect balance between control and power, offering a responsive feel that adapts to various playstyles, from defensive to aggressive.
- Enhanced Spin and Precision: The carbon fiber composition allows for a greater ability to impart spin on the ball, making it easier to control placement and achieve precise shots.
- Superior Power: Designed with aggressive players in mind, the Rafale provides explosive power on hard hits, making it ideal for fast-paced, high-energy games.
- Increased Stability: The fusion build minimizes vibrations and maximizes stability on off-center hits, ensuring more consistent shots, especially during intense rallies.
- Perfect for Advanced Players: Tailored for advanced players seeking power and control, the Rafale is engineered to excel in fast-paced, competitive play, offering confidence and comfort in every strike.
