

PICKLEBALL NET HEAVY

SPECIFICATIONS :

- 1 Portable Net Equipment, 1 Carry Bag
- Sturdy Frame: Typically made from steel or other heavy-duty materials, providing excellent durability and resistance to weather conditions.
- Enhanced Stability: The heavy design ensures that the net stays firmly in place during intense play, minimizing movement or shifting on the court.
- Weather-Resistant Netting: The net itself is made from high-quality, weatherproof materials like polyethylene, making it suitable for outdoor use without degradation.
- Portable Design: Despite its heavier frame, many heavy pickleball nets are designed for portability, often featuring easy assembly and disassembly.
- Regulation Size: Meets official pickleball net dimensions, with a length of 22 feet and a height of 36 inches at the sidelines and 34 inches at the center.
- Tension System: Comes with an adjustable tension system to keep the net taut during play, ensuring optimal performance.
